Part Number Update – Midland Air Disc Brake Pads

Supersessions and Additions

During 2026, Midland Air Disc Brake Pad XT, CV, and HD offerings will be transitioning to a Premium Line Haul (PLH) formulation over the coming months. Customers will continue to receive the same trusted fit, performance, and durability they expect–now delivered under updated packaging and part numbers designed to simplify identification and ordering.

The table below shows the existing part numbers that will be phased out and into the new Premium Line Haul and Severe Duty part numbers. The supersession will be accomplished in phases.

- HD Pro will supersede to the PLH starting in April 2026.
  - For severe duty applications (ADB22X, SK7, SB7, SN7, EX225H2, and ELSA) use the SD offering.
- CV Advanced will supersede to PLH starting in August 2026.
- Select XT will supersede to PLH starting in September 2026.
