

Innovative Vehicle Technology

PRESS RELEASE

Haldex AWD system presented by FIAT at Paris Motor Show

FIAT AUTO is showing a new concept car named NEA-Tripmate at this year's Paris Motor Show.

The NEA-Tripmate is a "friendly" car that is fun to drive and can take the family to their different activities, for example out on the beach or to picnic in the terrain off-road. A so called All Activity Vehicle.

FIAT has chosen the Haldex AWD-system because it is fully transparent to the driver. It is just there, doing the job when needed without any action from the driver.

Haldex AWD-system is connected to the CAN-bus, communicating with the other electronic systems in the car. This makes it possible for the built-in processor to optimize the traction in every driving situation.

This project is yet another confirmation of Haldex leading position in AWD technology.

Haldex is a global supplier of proprietary products for trucks, cars and industrial vehicles, with special emphasis on performance & safety. The Group is listed on the Stockholm Stock Exchange and has yearly sales of 6 BSEK with 4,400 employees. The Group has sales companies in Europe, North & South America and Asia. Production takes place at 8 factories in Europe and 8 in the U.S. as well as in India and Brazil.

For further information contact Claes Warnander, CEO, or Lennart Hammargren, CFO, Haldex AB (phone +46 8 678 7270).
