## Power flex coil – updated 15-pin plug

There is to be an aesthetic change applied to the 15-pin plug of our Grau power flex coils. There is no impact to product application. The new versions will retain the same part numbers as the old versions.

Brand: **Grau**

Part numbers affected:

**950611040** – EBS 15-pole to 7-pole 24N & 24S

**950611040/OM** – EBS 15-pole to moulded 7-pole 24N & 24S

Production has already moved to the new versions, but due to FIFO stock handling, it is not possible to determine precisely when our clients will see the change. Please expect this aesthetic change within the coming weeks.
