

New Service Housing Assembly for all Drum Brake 2430XL & 2030XL Spring Brakes

Starting in November 2010 all 76mm stroke Anchorlok® spring brakes will have a new stronger service housing. Part numbers that are affected by this change are shown in the table. The new service housing is thicker and has a distinctive stamped profile to increase rigidity. The new housing provides over 40% greater durability than the original product.

Blue Seal® Part Number	Description	Stroke (mm)	Pushrod Length (mm)
136 2430 001	2430XL	76	246
136 2430 004	2430XL	76	84
136 2430 005	2430XL	76	227
136 2430 006	2430XL	76	236
136 2030 001	2030XL	76	246
136 2030 002	2030XL	76	227
136 2030 004	2030XL	76	227

Original, flat bottom housing 3.43mm (.135 in) thickness

New thicker shaped housing 3.88mm (.149 in) thickness

Please review your application with the product change to ensure all performance and safety requirements are met.
