

produkt Bulletin

Issued by Joachim Ejlertsson	Introduction from serial No.	Date 2010-10-20	Product affected ModulX	P/B No DB 026L
Title / Subject REMOVAL OF P/N 92816		Reg No. 20091152	Edition / Replaces 1	Page 1/1

Removal of disc brake P/N 92816 from serial production

P/N 92816 is a DB22 version of the ModulX, aimed at gaining aftermarket share, since it fits on BPW-axles. The sales volumes for the brake have been extremely low however and as a result of the cost cutting program that is ongoing at ADB, the part number will be removed.

The removal of this part number will give Haldex the possibility to optimize the weight of the remaining DB22 carriers. The result will be a drop in weight of 1 kg for all remaining DB 22's.

P/N 92816 will be removed from production on the 22nd of October 2010.

NB: Notification of this change has previously been sent out to the concerned sales representatives
