

AA1 and S-ABA Design Update

In conjunction with the ABA manufacturing reorganization in 2020, the decision has been taken to incorporate new design changes to both the AA1 and S-ABA which will have riveted end covers, aligning with the Haldex ABA Global Design and dry thread lock adhesive, replacing the previous wet thread lock adhesive and no rivet design.

The ABA's are manufactured to the same high standards and specifications.

The change will be on a phased basis starting in January 2020.

Product: Automatic Brake Adjusters

Type of Change: Design Update

Reason for Change: Align with Global Design

Validation of Change: Manufactured to same standards and specifications

Introduction: January 2020
