

# ABS made easy.

Easy-to-install ABS upgrade kits from Haldex.

Kits install in 5 easy steps:

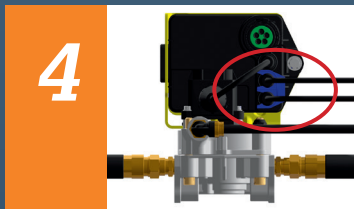

Install the new Haldex 6-Port ABS Relay Valve with ECU PLC Select assembly on air tank utilizing a 1/2" x 3/4" heavy wall nipple, part number 11327, in reservoir. Can be frame mounted using the preinstalled mounting bracket.

Reconnect service brake delivery hoses to delivery ports and plug unused delivery ports.

Reconnect the control line service to the control port on the front of the new valve.

Connect sensors. The curbside sensor (or sensor extension if needed) connects to the upper sensor terminal marked S1A on ECU and the roadside sensor connects to the lower sensor terminal marked S1B on the ECU.

Install new ABS power cord into the ECU. Secure power cord to power cord bracket with attached tie strap and insert blue sensor retainer clip.

The best replacement ABS systems you can buy are also the best original ABS systems you can specify. Insist on ABS systems by Haldex.

# Haldex PLC Select ABS Universal 2S/1M Chassis Replacement Kits:

## AQ960503 Contains

- (1) 6-Port ABS Relay Valve with 1M ECU for tank mount
- (2) 3.0M Sensor Extensions
- (1) 6.0M Power Cord Extension
- (1) Installation Instructions (L31203)
- (1) PLC Select Manual (L30041)

## AQ960510 Contains

- (1) 6-Port ABS Relay Valve with 1M ECU for tank mount
- (2) 2.0M Sensor Extensions
- (1) 6.0M Power Cord Extension
- (1) Installation Instructions (L31203)
- (1) PLC Select Manual (L30041)

## Installing your new Haldex ABS system:

**CAUTION:** Always follow your company's safety procedure when working on a vehicle. Disconnect electrical power and remove air pressure from the trailer, and drain the reservoir tank. Remove the old system. Inspect all fittings, hoses, and air lines prior to installing the new ABS system; repair or replace as necessary.

**Note:** Haldex recommends a light application of dielectric grease to all electrical connections during assembly.
