

PRODUCT ANNOUNCEMENT

ITCMTM Intelligent Trailer Control Module

Customization and Expandability

The Haldex ITCM increases the functionality of the Trailer ABS System by including six separate auxiliary ports that can manage additional devices.

Function Flexibility

The Haldex ITCM allows a fleet flexibility in auxiliary functions that best fit the fleet's needs; Roll Stability, Lift Axle Control and Brake Monitoring/Warning, just to name a few.

Communication Support

The Haldex ITCM platform includes PLC Protocol plus a CAN (Controller Area Network) port, which enables communication between devices and increases diagnostic options.
