* For use with external purge tank

Bendix® AD-SP

- Large MTC+ 5-stage desiccant cartridge eliminates more contamination than single stage competitors (9.2 SCF drying capacity)
- Heat resistant brass turbo protection valve lasts longer than plastic composite valves
- Heat shielded Purge Valve protects against failures due to heat
- Complete plug-n-play changeover from Bendix® AD-IS system
- Three year warranty

Haldex Remanufactured Air Treatment Products

Automatic Drain Valve
- Expels moisture with each brake application
- Removes excess moisture and contamination from "wet" tank
- Built in heater prevents freeze-ups
- Built in filter protects against contamination
- Performs independently from compressor cycling

Service #: 41210026
Description: 12 Volt Heater
Service #: 41210029
Description: 24 Volt Heater

Service #: 41010019
Description: 12 Volt Heater
Service #: 41010021
Description: 24 Volt Heater

CONSEP® Condenser/Separator
- Condenses and separates oil, water and other contaminants in compressed air line, substantially increasing desiccant life
- Ideal for transit and heavy braking applications
- Installs between compressor and air dryer, or can be used as a stand alone unit
- Purges contaminants with each brake application
- Includes ADV, Automatic Drain Valve
