Air Control Kit

Manually operated height control valve selection kit for straight truck applications in grading high crown gravel roads.

L31210
(95220011)
Rev. 1/04

**NOTE:**

The AC-8705 air control kit is recommended for use in GRADING HIGH CROWN GRAVEL ROADS. This is not a "dump" kit. All air bags will remain inflated when switch is in the "ON" or "OFF" position.

IMPORTANT:

Not recommended for snow and ice removal, dump or tip applications. DO NOT travel at high speeds with the switch in the "ON" position.

NOTE:

This kit does not include height control valves, pressure protection valve, brackets, linkages, or fittings.

MANUAL SWITCH OPERATION

1. OFF SWITCH POSITION - NON GRADING OPERATION
 With switch in "OFF" position the curbside height control valve controls curbside air springs. The roadside height control valve controls roadside air springs.

2. ON SWITCH POSITION - GRADING OPERATION
 With switch in "ON" position the roadside height control valve controls all air springs.
