

Haldex ILAS III Valve Product Change Notification

Beginning immediately, Haldex is making a running change to offer the ILAS III Valves with a 1/4" - 18 NPT threaded port design for all North American customers. The change from 3/8" Push-To-Connect (PTC) fittings will allow for universal pipe size and add opportunity for possible replacement of fittings, if necessary in the later stages of service life. Fittings will no longer be pre-installed or included with the new design.

Automatic

Manual

Haldex is in the process of releasing a fitting kit that will include five each 1/4"-18 NPT, 3/8" Tube Push-To-Connect (PTC) fittings. Please note that PTC fittings should not be used in Canada due to extreme cold. Maximum torque values will be determined by the style of fitting chosen for installation; however, there should be no air leaks at the fitting joints when full system pressure is applied. Always follow the fitting manufacturer's recommendations regarding torque, sealant and lubricant.

Should you have questions regarding this product change notification, please contact your local Haldex Sales Professional.
