

Haldex Discontinues PR Height Control Valve Product Offering

Haldex is targeting September 2020 to discontinue the PR Height Control Valve (HCV) product line. With the expansion of the Haldex PR Plus HCV product line, most all applications are covered. The PR and PR Plus valve assemblies, mounting and setup are the same, port configurations are different. The PR Plus valve uses a distribution manifold where the PR valve uses ports in the valve body. The replacement chart below will help in conversion selection.

Cancelled PR Part No.	Replacement PR Plus Part No.	Notes
90555331	90554905	Direct replacement
90555332	90554905	Plug one of the delivery ports
90555335	90554945	Plug one of the delivery ports, use arm from original valve
90555336	90554945	Plug one of the delivery ports, use arm from original valve
90555365	90555142	Direct replacement
