

SAF-HOLLAND Announces Haldex DBT22LD Air Disc Brake as a Databook Option on International LT and RH Series Tractors

Muskegon, Michigan, February 23, 2023 – SAF-HOLLAND, a leading global manufacturer of heavy-duty commercial vehicle components, is pleased to announce that Navistar has released the Haldex ModuIT DBT22LD Air Disc Brake as a Databook option on International LT and RH series tractor platforms, effective April of 2023. The DBT22LD is new to the ModuIT product family and optimized for North American tractors.

The DBT22LD offers our customers more uptime and a lower operating cost with a simple and effective design. Two key features are the large-diameter, single-piston, and lube-free slide pins. The brake package also features the premium Haldex LifeSeal+ double diaphragm spring brake chamber, which has a fully sealed spring brake housing to extend the product's life.

"We are very excited to grow our long-term partnership with Navistar. The ModuIT DBT22LD and the LifeSeal+ brake package will be a great start to this growth," said Matt Resch, Vice President – OEM Power Sales (Americas).

About SAF-HOLLAND Group

SAF-HOLLAND Group is one of the largest independent listed suppliers to the heavy-duty commercial vehicle market with sales of approximately EUR 1,247 million in 2021. The Company manufactures and supplies chassis-related systems and components primarily for trailers, trucks, buses, and recreational vehicles. The product range comprises axle and suspension systems, fifth wheels, kingpins, and landing gear marketed under the brands SAF, Haldex, Holland, Neway, KLL, V.Orlandi, and York. SAF-HOLLAND sells its products to Original Equipment Manufacturers (OEM) on six continents. The Group's Aftermarket business supplies spare parts to the service networks of Original Equipment Suppliers (OES), as well as to end customers and service centers through its extensive global distribution network. SAF-HOLLAND is one of the few suppliers in the truck and trailer industry that is internationally positioned in almost all markets worldwide. With the innovation campaign "SMART STEEL – ENGINEER BUILD CONNECT" SAF-HOLLAND combines mechanics with sensors and electronics to drive the digital networking of commercial vehicles and logistics chains. More than 5,600 committed employees worldwide are already today working on the future of the transportation industry.
